EXPERIENCE

Specialist Programmer

Aug 2022 – Present

Infosys

Hyderabad, IND

Australian Open | Roland Garros

- Developed and maintained responsive and cross browser compatible web applications using ReactJs
- Implemented pixel-perfect UI/UX designs in collaboration with the design team, shortening development duration by 25% and achieving a 97% accuracy rate in visual fidelity.
- Worked closely with backend developers, achieving 100% seamless integration of front-end and back-end components, resulting in a 30% reduction in post-launch bugs.
- Conducted thorough testing and debugging, resolving 95 percent of frontend issues before the client testing phase
- Provided production support, ensuring 99.9% uptime and addressing critical issues with an average resolution time of 4 hours.

ORCA

- Engineered a custom React framework for an Apple project, streamlining front-end workflows and reducing development time by 40%, while increasing code re-usability by 30%
- Built reusable components such as search fields, dropdown menus, and file upload modules.
- Ensured all components complied with Apple's performance and accessibility standards, reducing post-launch issues by 20%
